# ROLLS-ROYCE MOTOR CARS

The values of fuel consumptions, CO<sub>2</sub> emissions and energy consumptions shown are already based on the new WLTP test-cycle and determined according to the European Regulation (EC) 715/2007 in the version applicable at the time of type approval. The figures shown consider optional equipment and the different size of wheels and tyres available on the selected model. Changes of the configuration can lead to changes of the values. For vehicle related taxes or other duties based (at least inter alia) on CO<sub>2</sub> emissions the CO<sub>2</sub> values may differ to the values stated here. They do not relate to any one particular vehicle, nor are they part of any offer made, rather they are solely for the purpose of comparing different kinds of vehicle. Further information about the official fuel consumption and the specific CO<sub>2</sub> emissions of new passenger cars can be taken out of the "Guide to Fuel Consumption, CO<sub>2</sub> Emissions and Electricity Consumption of New Passenger Cars", which is available at all selling points and at [carfueldata.direct.gov.uk](http://carfueldata.direct.gov.uk) in the United Kingdom and or your local government authority.
